Legal process directory

Know where an app keeps its data

A sourced JSON and YAML database of application and artifact metadata for examiners, with a Windows app that looks an app up by name, Android package, or Apple bundle ID.

At a glance

VERSION
v1.0.4

RELEASED
10/07/2026

PLATFORM
Windows (x64), JSON and YAML

STATUS
Shipped

- **Private by design**
- **A source for every claim**
- **Signed for Windows**
- **JSON and YAML**

Validate it under your lab's own procedures.

Key capabilities

Sourced records
Each record lists its sources by title, publisher, address, and the date each was read.

A Windows app
Search by app name, Android package, or Apple bundle ID and get one card: preservation, emergency disclosure, and legal-process links, artifact paths, parsers, and validation status.

Artifacts
File names and paths as public forensic parsers report them, with known limits.

JSON and YAML
The whole snapshot in one file, and one file per record group, in both formats.

A status on every claim
Verified, reported, or disputed, with a statement of what was and was not checked.

Apps and identifiers
67 apps, with Android package names and Apple bundle ids.

Providers and legal process
Published law-enforcement guides, request portals, preservation, and emergency disclosure pages.

Requirements

App	Windows (x64). The .NET runtime is included in the download.	**Network**	Not needed for lookups. Used only for the optional update check.
Installer	46 MB, per user, no administrator rights needed	**Portable zip**	62 MB, no install needed
Code signing	Authenticode-signed through Microsoft Artifact Signing, with a timestamp.	**Data format**	JSON and YAML, UTF-8
Data zip	341 KB, one zip	**Checker**	Python 3.8 or later, standard library only
Snapshot	Generated 10/06/2026		

Verify the download

Each published file has its SHA-256 on this page, with the Windows commands to check it.

DEVI-Registry-Setup-1.0.4-win-x64.exe

```
